GoCustify AI Receptionist — Final Developer Implementation Task

Objective

Build one reusable AI Receptionist system for all supported GoCustify businesses.

Supported business templates:

1. Dentist
2. Medical Clinic
3. Chiropractor
4. Salon / Spa
5. Law Firm
6. Real Estate
7. Home Services
8. Restaurant
9. Auto Repair Shop
10. Fitness Studio / Gym
11. Retail Store
12. Accounting / Bookkeeping Firm
13. Insurance Agency
14. Veterinary Clinic
15. Photography
16. Consulting Firm
17. Other / Custom

Do NOT build separate AI systems for every industry.

Use:

One AI Receptionist Engine + Industry Templates

The AI should understand natural conversation, determine caller intent, answer from approved business information, complete permitted actions, route calls, or take a brief message.

---

1. Business Owner Setup

Under:

AI Receptionist

Allow the business owner to configure:

Business Type

Select one supported industry.

GoCustify automatically loads the appropriate industry template.

AI Name

Example:

Sarah

Voice

Choose available AI voice.

Language

Choose supported language(s).

Inbound Greeting

Provide:

- 🎤 Voice to Text
- ✨ AI Suggested Message
- ✏ Manual Edit / Write My Own

Outbound Greeting

Provide:

- 🎤 Voice to Text
- ✨ AI Suggested Message
- ✏ Manual Edit / Write My Own

AI editing options may include:

- Make friendlier
- Make more professional
- Make shorter

- Make warmer
- Make more conversational
- Make more sales-focused
- Fix grammar
- Rewrite

---

2. Keep These Three Layers Separate

GoCustify must separate:

Conversation

What the AI says.

Understanding

What the caller means.

Authorization

What the AI is actually allowed to do.

Changing the AI script must never automatically grant backend permissions.

Example:

The owner writes:

“Cancel appointments when requested.”

But:

```
CALENDAR_CANCEL = DISABLED
```

The AI must not cancel appointments.

Permissions must be enforced server-side.

---

3. Generic Inbound Behavior

Default:

“Thank you for calling [Business Name]. This is [AI Name], the virtual receptionist. How can I help you today?”

Do NOT immediately force the caller to provide their name.

Listen first.

Example:

Caller:

“What time do you close?”

AI:

“We close at 6 PM today.”

No identification required.

Caller:

“I need to move my appointment.”

AI:

“Absolutely. May I have the name associated with the appointment?”

The AI should collect information only when necessary.

---

4. Generic Outbound Behavior

Default:

“Hi, may I speak with [Customer Name]? This is [AI Name], the virtual assistant calling on behalf of [Business Name]. I’m calling regarding [Reason for Call]. Is now a good time?”

Supported outbound purposes:

- Appointment reminder
- Appointment confirmation
- Missed-call callback
- New lead follow-up
- Quote follow-up
- Estimate follow-up
- Service reminder

- Rebooking
- Customer reactivation
- Order/service update
- Callback
- Custom campaign

Sensitive information should not be disclosed before appropriate verification.

---

5. Universal AI Call Logic

Use:

Caller speaks

→ Intent detection

→ Required information extraction

→ Industry template

→ Business knowledge lookup

→ Permission check

→ Verification if required

→ Ask only necessary questions

→ Perform action or route

→ Wait for backend result

→ Tell caller actual result

→ Send SMS/email if configured

→ Update CRM

→ Create brief call summary

---

6. Do Not Build Keyword-Only Logic

Do NOT build:

`keyword → fixed action`

Example:

Caller says:

“I don't want to cancel my appointment.”

This contains:

`cancel`

but intent is:

`KEEP_APPOINTMENT`

Use natural-language intent classification.

Keywords/example phrases are only recognition aids.

---

7. Universal Core Intents

All businesses should support where applicable:

`GENERAL_QUESTION`

`NEW_CUSTOMER`

`EXISTING_CUSTOMER`

`APPOINTMENT_SCHEDULE`

`APPOINTMENT_RESCHEDULE`

`APPOINTMENT_CANCEL`

`APPOINTMENT_CONFIRM`

`SERVICE_REQUEST`

`QUOTE_REQUEST`

`PRICING_QUESTION`

`BILLING_QUESTION`

`BUSINESS_HOURS`

`LOCATION`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

`HUMAN_TRANSFER`

`COMPLAINT`

`UNKNOWN_INTENT`

Industry templates add specialized intents.

---

8. Brief Message Taking

Message-taking must stay SIMPLE.

When a person or department is unavailable:

“I can take a brief message for them. May I have your name, phone number, and a short message?”

Collect only:

`caller_name`

`phone_number`

`brief_message`

Optional:

`recipient_or_department`

`callback_requested`

The AI should summarize long explanations automatically.

Example caller:

“My name is John Smith. I’ve had pain on the lower left side of my mouth for two days and it got worse overnight. Can somebody call me?”

Save:

John Smith
Phone: 555-123-4567
Message: Lower-left tooth pain for two days; worsening. Requests callback.

Do NOT turn message-taking into a full intake questionnaire.

Only a separate business workflow may ask additional questions when genuinely required.

---

9. Message Examples by Industry

Dentist / Medical / Chiropractor

“Tooth pain for two days; requests callback.”

“Persistent cough; requests clinic callback.”

“Lower-back pain after recent strain; requests chiropractic appointment or callback.”

Home Services

“AC stopped cooling this morning; requests technician callback.”

“Kitchen sink leaking under cabinet; requests service.”

Law Firm

“Calling regarding car accident consultation; requests attorney callback.”

Real Estate

“Interested in property at [Address]; requests agent callback.”

Auto Repair

“Check-engine light came on; asks whether shop can inspect vehicle tomorrow.”

Veterinary

“Dog has been vomiting since this morning; requests callback.”

The AI should create one or two concise sentences.

---

10. Business Message Inbox

Add:

Communications → AI Messages

Show:

- Caller name
- Phone
- Brief message
- Recipient/team
- Callback requested
- Time received
- Status

Example:

John Smith
555-123-4567

Message: Lower-left tooth pain for two days; worsening. Requests callback.

For: Front Desk
Received: 2:15 PM
Status: New

Actions:

- Call
- Text
- Assign
- Mark Read
- Mark Complete
- Open Customer
- View Call/Transcript

Statuses:

```
NEW
```

```
READ
```

```
COMPLETED
```

Keep this simple.

---

11. Message vs Callback

Caller says:

“Tell Sarah I sent the paperwork.”

Create:

`TAKE_MESSAGE`

Caller says:

“Please have Sarah call me.”

Create:

`TAKE_MESSAGE`

plus:

`CALLBACK_REQUEST`

---

12. Human Transfer

If caller says:

“Let me speak with someone.”

Try transfer.

If unavailable:

“They’re unavailable right now. I can take a brief message or have someone call you back.”

Options:

`TAKE_MESSAGE`

or:

`CALLBACK_REQUEST`

---

13. Integration Failure Fallback

If Calendar, CRM, SMS, or another required integration is unavailable, the AI must not get stuck or claim success.

Example:

“I wasn’t able to complete that electronically right now. I can take a brief message and have the team follow up with you.”

Then create:

`TAKE_MESSAGE`

or:

`CALLBACK_REQUEST`

Do not invent successful actions.

---

14. Scheduling Structure

Scheduling must consider more than an empty calendar slot.

Use:

`appointment_type`

`duration`

`eligible_staff`

`location`

`availability`

Example:

Dental cleaning:

`duration = 60 minutes`

Medical consultation:

```
duration = 30 minutes
```

Chiropractic new-patient consultation:

```
duration = business-configured
```

Chiropractic adjustment:

```
duration = business-configured
```

Massage:

```
duration = 90 minutes
```

The AI should only offer times where:

- Correct service duration fits
- Correct provider/staff is available
- Correct location is available
- Business hours/rules allow booking

---

15. Scheduling Permissions

Business owner controls:

- Schedule
- Reschedule
- Cancel

Each:

```
DISABLED
```

```
AI_ALLOWED
```

```
HUMAN_APPROVAL_REQUIRED
```

Before any change, AI verbally confirms.

Example:

“Just to confirm, you want to move your appointment from Tuesday at 10 AM to Friday at 2 PM. Is that correct?”

Only proceed after confirmation.

---

16. Backend Action Confirmation

The AI must never say an action succeeded before the backend confirms it.

Flow:

Caller confirms

→ backend action

→ backend result

If:

`ACTION_SUCCESS`

AI:

“You’re all set. Your appointment has been updated.”

If:

`ACTION_FAILED`

AI:

“I wasn’t able to complete that change. I can connect you with the business or arrange a callback.”

Support:

`ACTION_SUCCESS`

`ACTION_FAILED`

`ACTION_TIMEOUT`

`REQUIRES_HUMAN`

`NO_AVAILABILITY`

`INTEGRATION_OFFLINE`

`PERMISSION_DENIED`

UNKNOWN

---

17. Dentist Template

Inbound

“Thank you for calling [Dental Practice Name]. This is [AI Name], the virtual receptionist. How can I help you today?”

Outbound

“Hi, may I speak with [Customer Name]? This is [AI Name], the virtual assistant calling on behalf of [Dental Practice Name]. I’m reaching out regarding [Reason for Call]. Is now a good time?”

Supported Intents

NEW_PATIENT

EXISTING_PATIENT

APPOINTMENT_SCHEDULE

APPOINTMENT_RESCHEDULE

APPOINTMENT_CANCEL

APPOINTMENT_CONFIRM

CLEANING

DENTAL_EXAM

TOOTH_PAIN

DENTAL_EMERGENCY

COSMETIC_DENTISTRY

IMPLANT_CONSULTATION

ORTHODONTICS

```
INSURANCE_QUESTION

INSURANCE_ACCEPTED

INSURANCE_IN_NETWORK

INSURANCE_BENEFITS

INSURANCE_VERIFICATION

BILLING

PRICING

PRESCRIPTION_REQUEST

RECORDS_REQUEST

REFERRAL_REQUEST

TAKE_MESSAGE

CALLBACK_REQUEST

HUMAN_TRANSFER
```

---

18. Dental Insurance Recognition

Recognize common names:

- Delta Dental
- Cigna Dental
- Aetna Dental
- MetLife Dental
- Guardian
- UnitedHealthcare Dental
- Blue Cross Blue Shield Dental
- Humana Dental
- Ameritas
- Principal
- Sun Life
- United Concordia
- DentaQuest
- GEHA
- Other configured insurer

Important:

This is only an insurer recognition dictionary.

Recognition does NOT mean the clinic accepts that insurance.

---

19. Dental Insurance Authority

Actual answer must come from business-specific configuration:

`payer`

`plan_name`

`accepted`

`network_status`

`verification_required`

`effective_from`

`effective_until`

`last_verified_at`

Possible network status:

`IN_NETWORK`

`OUT_OF_NETWORK`

`PLAN_DEPENDENT`

`UNKNOWN`

If unknown:

“I don’t have confirmed information for that specific plan. I can have the office verify it for you.”

---

20. Medical Clinic Template

Inbound

“Thank you for calling [Clinic Name]. This is [AI Name], the virtual receptionist. How may I help you today?”

Outbound

“Hello, may I speak with [Patient Name]? This is [AI Name], the virtual assistant calling on behalf of [Clinic Name] regarding [Reason for Call]. Is now a good time?”

Supported Intents

`NEW_PATIENT`

`EXISTING_PATIENT`

`APPOINTMENT_SCHEDULE`

`APPOINTMENT_RESCHEDULE`

`APPOINTMENT_CANCEL`

`APPOINTMENT_CONFIRM`

`FOLLOW_UP_VISIT`

`ANNUAL_EXAM`

`REFERRAL_REQUEST`

`PRESCRIPTION_REQUEST`

`MEDICAL_RECORDS`

`LAB_QUESTION`

`INSURANCE_QUESTION`

`INSURANCE_ACCEPTED`

`INSURANCE_IN_NETWORK`

`INSURANCE_BENEFITS`

`INSURANCE_VERIFICATION`

```
MEDICARE_QUESTION

MEDICAID_QUESTION

BILLING

MEDICAL_CONCERN

MEDICAL_EMERGENCY

TAKE_MESSAGE

CALLBACK_REQUEST

HUMAN_TRANSFER
```

---

21. Medical Insurance Recognition

Recognize common names:

- Blue Cross Blue Shield
- Anthem
- Aetna
- Cigna
- UnitedHealthcare
- Humana
- Medicare
- Medicaid
- Molina
- Ambetter
- Oscar
- TRICARE
- WellCare
- Other configured insurer

Again:

Recognition does not mean accepted or in-network.

Use the clinic's configured insurance table as authority.

---

22. Chiropractor Template

Inbound

“Thank you for calling [Chiropractic Clinic Name]. This is [AI Name], the virtual receptionist. How can I help you today?”

The AI should listen first.

If scheduling or patient-specific assistance is required:

“Certainly. Are you a new patient or an existing patient?”

Then ask only what is necessary.

Outbound

“Hi, may I speak with [Patient Name]? This is [AI Name], the virtual assistant calling on behalf of [Chiropractic Clinic Name]. I’m reaching out regarding [Reason for Call]. Is now a good time?”

Supported Intents

`NEW_PATIENT`

`EXISTING_PATIENT`

`CONSULTATION_REQUEST`

`APPOINTMENT_SCHEDULE`

`APPOINTMENT_RESCHEDULE`

`APPOINTMENT_CANCEL`

`APPOINTMENT_CONFIRM`

`ADJUSTMENT_APPOINTMENT`

`FOLLOW_UP_VISIT`

`NEW_PATIENT_EXAM`

`PAIN_OR_SYMPTOM_CONCERN`

`INSURANCE_QUESTION`

`INSURANCE_ACCEPTED`

```
INSURANCE_IN_NETWORK

INSURANCE_BENEFITS

INSURANCE_VERIFICATION

PRICING

BILLING

RECORDS_REQUEST

TAKE_MESSAGE

CALLBACK_REQUEST

HUMAN_TRANSFER
```

Common Caller Examples

- I’m a new patient
- I need an adjustment
- I need to schedule
- I need to move my appointment
- I need to cancel
- Do you accept my insurance?
- Are you in network?
- How much is a visit?
- My back hurts
- My neck hurts
- I need someone to call me back

The AI should classify the intent from the entire statement rather than exact keywords.

Chiropractic Insurance

Use the same insurance architecture as Medical Clinic.

Recognition may include common medical insurers such as:

- Blue Cross Blue Shield
- Anthem
- Aetna
- Cigna
- UnitedHealthcare
- Humana
- Medicare where applicable

- Medicaid where applicable
- Other business-configured plans

Recognition is not authority.

Actual acceptance and network status must come from the chiropractic clinic's configured payer/plan data.

Chiropractic Safety Rule

The AI must not:

- Diagnose a condition
- Tell a caller what condition they have
- Promise that chiropractic treatment will cure or resolve a condition
- Recommend unsafe self-treatment
- Guarantee that insurance covers treatment
- Interpret imaging or clinical results independently

If a caller describes symptoms requiring medical escalation based on configured safety rules, route appropriately rather than treating the call as an ordinary adjustment request.

---

23. Salon / Spa Template

Inbound

"Thank you for calling [Salon/Spa Name]. This is [AI Name], the virtual receptionist. How can I help you today?"

Outbound

"Hi [Customer Name], this is [AI Name] calling on behalf of [Salon/Spa Name] regarding [Appointment/Service/Inquiry]. Is now a good time?"

Supported Intents

`APPOINTMENT_SCHEDULE`

`APPOINTMENT_RESCHEDULE`

`APPOINTMENT_CANCEL`

`SERVICE_INQUIRY`

`HAIRCUT`

`HAIR_COLOR`

`NAILS`

`FACIAL`

`MASSAGE`

`WAXING`

`LASHES`

`BROWS`

`STYLIST_REQUEST`

`PRICING`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

`HUMAN_TRANSFER`

---

24. Law Firm Template

Inbound

“Thank you for calling [Law Firm Name]. This is [AI Name], the virtual receptionist. How may I assist you today?”

If appropriate:

“Are you calling regarding a new legal matter or an existing matter with the firm?”

Outbound

“Hello, may I speak with [Customer Name]? This is [AI Name], the virtual assistant calling on behalf of [Law Firm Name] regarding [Reason for Call]. Is now a good time?”

Supported Intents

`NEW_POTENTIAL_CLIENT`

`EXISTING_CLIENT`

`CONSULTATION_REQUEST`

`CONSULTATION_RESCHEDULE`

`CONSULTATION_CANCEL`

`CASE_STATUS_REQUEST`

`ATTORNEY_CALLBACK`

`DOCUMENT_REQUEST`

`BILLING`

`PERSONAL_INJURY`

`BUSINESS_LAW`

`ESTATE_PLANNING`

`REAL_ESTATE_LAW`

`EMPLOYMENT_LAW`

`BANKRUPTCY`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

`HUMAN_TRANSFER`

AI must not provide legal advice.

---

25. Real Estate Template

Inbound

“Thank you for calling [Real Estate Company Name]. This is [AI Name], the virtual assistant. How can I help you today?”

If useful:

“Are you looking to buy, sell, rent, or ask about a specific property?”

Outbound

“Hi [Customer Name], this is [AI Name] calling on behalf of [Real Estate Company Name] regarding [Property/Inquiry]. Is now a good time?”

Supported Intents

`BUYER_LEAD`

`SELLER_LEAD`

`RENTER_LEAD`

`PROPERTY_INQUIRY`

`SHOWING_REQUEST`

`SHOWING_RESCHEDULE`

`SHOWING_CANCEL`

`LISTING_CONSULTATION`

`PROPERTY_VALUE_REQUEST`

`OPEN_HOUSE`

`AGENT_CALLBACK`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

`HUMAN_TRANSFER`

---

26. Home Services Template

Includes:

- HVAC
- Plumbing
- Electrical
- Roofing
- Landscaping
- Cleaning
- Pest control
- General contractors
- Appliance repair
- Handyman
- Similar businesses

Inbound

“Thank you for calling [Company Name]. This is [AI Name], the virtual receptionist. What type of service can I help you with today?”

Outbound

“Hi [Customer Name], this is [AI Name] calling on behalf of [Company Name] regarding your [Service Request/Estimate/Appointment]. Is now a good time?”

Supported Intents

`NEW_SERVICE_REQUEST`

`SERVICE_APPOINTMENT`

`RESCHEDULE_SERVICE`

`CANCEL_SERVICE`

`ESTIMATE_REQUEST`

`ESTIMATE_FOLLOW_UP`

`TECHNICIAN_STATUS`

`EXISTING_JOB`

`WARRANTY`

`MAINTENANCE`

`EMERGENCY_SERVICE`

`BILLING`

`SERVICE_AREA`

`HEATING_NOT_WORKING`

Plumbing:

`LEAK`

`CLOGGED_DRAIN`

`WATER_HEATER`

Electrical:

`POWER_ISSUE`

`OUTLET_ISSUE`

`PANEL_UPGRADE`

---

27. Restaurant Template

Inbound

“Thank you for calling [Restaurant Name]. This is [AI Name], the virtual assistant. How may I help you today?”

Outbound

“Hi [Customer Name], this is [AI Name] calling on behalf of [Restaurant Name] regarding [Reservation/Event/Inquiry]. Is now a good time?”

Supported Intents

`NEW_RESERVATION`

`RESERVATION_CHANGE`

`RESERVATION_CANCEL`

`RESERVATION_CONFIRM`

`WAITLIST`

`MENU_QUESTION`

`HOURS`

`LOCATION`

`PRIVATE_EVENT`

`CATERING`

`LARGE_PARTY`

`TAKEOUT_STATUS`

`COMPLAINT`

`MANAGER_REQUEST`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

---

28. Auto Repair Shop Template

Inbound

“Thank you for calling [Auto Repair Shop Name]. This is [AI Name], the virtual receptionist. How can I help you with your vehicle today?”

Outbound

“Hi [Customer Name], this is [AI Name] calling on behalf of [Auto Repair Shop Name] regarding your [Vehicle/Service/Estimate]. Is now a good time?”

Supported Intents

`SERVICE_APPOINTMENT`

`RESCHEDULE_SERVICE`

`CANCEL_SERVICE`

`DIAGNOSTIC_REQUEST`

`OIL_CHANGE`

`BRAKES`

`TIRES`

`ENGINE`

`TRANSMISSION`

`BATTERY`

`AC_REPAIR`

`INSPECTION`

`ESTIMATE_REQUEST`

`REPAIR_STATUS`

`VEHICLE_READY`

`TOWING`

`BILLING`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

`HUMAN_TRANSFER`

Collect where required:

- Year
- Make
- Model
- Problem

---

29. Fitness Studio / Gym Template

Inbound

“Thank you for calling [Gym/Studio Name]. This is [AI Name], the virtual assistant. How can I help you today?”

Outbound

“Hi [Customer Name], this is [AI Name] calling on behalf of [Gym/Studio Name] regarding [Membership/Class/Training Inquiry]. Is now a good time?”

Supported Intents

`MEMBERSHIP_INQUIRY`

`NEW_MEMBERSHIP`

`MEMBERSHIP_CANCEL`

`MEMBERSHIP_FREEZE`

`CLASS_BOOKING`

`CLASS_RESCHEDULE`

`CLASS_CANCEL`

`PERSONAL_TRAINING`

`TRIAL_CLASS`

`TOUR_REQUEST`

`CLASS_SCHEDULE`

`PRICING`

`BILLING`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

`HUMAN_TRANSFER`

---

30. Retail Store Template

Inbound

“Thank you for calling [Store Name]. This is [AI Name], the virtual assistant. How can I help you today?”

Outbound

“Hi [Customer Name], this is [AI Name] calling on behalf of [Store Name] regarding [Order/Product/Inquiry]. Is now a good time?”

Supported Intents

`PRODUCT_AVAILABILITY`

`PRODUCT_INFORMATION`

`ORDER_STATUS`

`ORDER_PICKUP`

`ORDER_CANCEL`

`RETURN_REQUEST`

`EXCHANGE_REQUEST`

`REFUND_STATUS`

`STORE_HOURS`

`STORE_LOCATION`

`PROMOTION`

`MANAGER_REQUEST`

`COMPLAINT`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

`HUMAN_TRANSFER`

---

31. Accounting / Bookkeeping Template

Inbound

“Thank you for calling [Accounting Firm Name]. This is [AI Name], the virtual receptionist. How may I assist you today?”

If needed:

“Are you an existing client or are you interested in becoming a new client?”

Outbound

“Hello [Customer Name], this is [AI Name] calling on behalf of [Accounting Firm Name] regarding [Reason for Call]. Is now a good time?”

Supported Intents

`NEW_CLIENT`

`EXISTING_CLIENT`

```
CONSULTATION_REQUEST

CONSULTATION_RESCHEDULE

CONSULTATION_CANCEL

TAX_PREPARATION

BOOKKEEPING

PAYROLL

BUSINESS_TAX

PERSONAL_TAX

IRS_NOTICE

DOCUMENT_REQUEST

INVOICE_QUESTION

PAYMENT_QUESTION

ACCOUNTANT_CALLBACK

TAKE_MESSAGE

CALLBACK_REQUEST

HUMAN_TRANSFER
```

AI should not provide unsupported tax or legal conclusions.

---

32. Insurance Agency Template

Inbound

“Thank you for calling [Insurance Agency Name]. This is [AI Name], the virtual assistant. How can I help you today?”

If useful:

“Are you calling about a new quote, an existing policy, a claim, or something else?”

Outbound

“Hi [Customer Name], this is [AI Name] calling on behalf of [Insurance Agency Name] regarding [Quote/Policy/Appointment]. Is now a good time?”

Supported Intents

`NEW_QUOTE`

`EXISTING_POLICY`

`AUTO_INSURANCE`

`HOME_INSURANCE`

`RENTERS_INSURANCE`

`COMMERCIAL_INSURANCE`

`LIFE_INSURANCE`

`POLICY_CHANGE_REQUEST`

`POLICY_RENEWAL`

`PAYMENT_QUESTION`

`CLAIM_QUESTION`

`CLAIM_STATUS`

`DOCUMENT_REQUEST`

`AGENT_CALLBACK`

`APPOINTMENT`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

`HUMAN_TRANSFER`

AI must not falsely claim to be a licensed insurance professional.

---

33. Veterinary Clinic Template

Inbound

“Thank you for calling [Veterinary Clinic Name]. This is [AI Name], the virtual receptionist. How can I help you and your pet today?”

If needed:

“What is your pet’s name?”

Outbound

“Hi [Customer Name], this is [AI Name] calling on behalf of [Veterinary Clinic Name] regarding [Pet Name] and [Reason for Call]. Is now a good time?”

Supported Intents

`NEW_CLIENT`

`APPOINTMENT_SCHEDULE`

`APPOINTMENT_RESCHEDULE`

`APPOINTMENT_CANCEL`

`WELLNESS_EXAM`

`VACCINATION`

`SICK_PET`

`URGENT_PET_CONCERN`

`EMERGENCY`

`PRESCRIPTION_REQUEST`

`RECORDS_REQUEST`

`BOARDING`

`GROOMING`

`BILLING`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

`HUMAN_TRANSFER`

AI should not diagnose veterinary conditions.

---

34. Photography Template

Inbound

“Thank you for calling [Photography Business Name]. This is [AI Name], the virtual assistant. How can I help you today?”

If needed:

“What type of photography service are you interested in?”

Outbound

“Hi [Customer Name], this is [AI Name] calling on behalf of [Photography Business Name] regarding your [Session/Event Inquiry]. Is now a good time?”

Supported Intents

`NEW_INQUIRY`

`SESSION_BOOKING`

`RESCHEDULE_SESSION`

`CANCEL_SESSION`

`WEDDING_PHOTOGRAPHY`

`PORTRAIT_SESSION`

`FAMILY_SESSION`

`EVENT_PHOTOGRAPHY`

`COMMERCIAL_PHOTOGRAPHY`

`REAL_ESTATE_PHOTOGRAPHY`

`PRICING`

`PACKAGE_QUESTION`

`AVAILABILITY`

`PHOTO_DELIVERY`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

`HUMAN_TRANSFER`

---

35. Consulting Firm Template

Inbound

“Thank you for calling [Consulting Firm Name]. This is [AI Name], the virtual assistant. How may I assist you today?”

If needed:

“Are you calling about a new consulting engagement or an existing project?”

Outbound

“Hello [Customer Name], this is [AI Name] calling on behalf of [Consulting Firm Name] regarding [Inquiry/Consultation/Project]. Is now a good time?”

Supported Intents

`NEW_LEAD`

`EXISTING_CLIENT`

`CONSULTATION_REQUEST`

`CONSULTATION_RESCHEDULE`

`CONSULTATION_CANCEL`

`SERVICE_INQUIRY`

`PROJECT_STATUS`

`PROPOSAL_QUESTION`

`PRICING`

`CONTRACT`

`DOCUMENT_REQUEST`

`CONSULTANT_CALLBACK`

`BILLING`

`TAKE_MESSAGE`

`CALLBACK_REQUEST`

`HUMAN_TRANSFER`

---

36. Other / Custom Business

Inbound

“Thank you for calling [Business Name]. This is [AI Name], the virtual assistant. How can I help you today?”

Outbound

“Hi [Customer Name], this is [AI Name], the virtual assistant calling on behalf of [Business Name] regarding [Reason for Call]. Is now a good time?”

Supported Intents

`GENERAL_INQUIRY`

`NEW_CUSTOMER`

`EXISTING_CUSTOMER`

`APPOINTMENT_SCHEDULE`

`APPOINTMENT_RESCHEDULE`

`APPOINTMENT_CANCEL`

`SERVICE_REQUEST`

`QUOTE_REQUEST`

`ORDER_STATUS`

`BILLING`

`PRICING`

`PRODUCT_INFORMATION`

`SERVICE_INFORMATION`

`BUSINESS_HOURS`

`LOCATION`

`CALLBACK_REQUEST`

`TAKE_MESSAGE`

`HUMAN_TRANSFER`

`UNKNOWN_INTENT`

Allow custom intents later.

---

37. Routing

Allow intents to route to:

- Owner
- Front Desk
- Scheduling
- Sales
- Billing
- Insurance
- Customer Service

- Clinical Staff
- Chiropractic Staff
- Attorney / Legal Intake
- Agent
- Technician / Dispatch
- Manager
- Custom Team

The business owner chooses which employee/team receives each route.

---

38. Business Knowledge

The AI should answer only from approved business information:

- Business name
- Hours
- Locations
- Services
- Pricing
- Staff
- Appointment types
- Appointment durations
- Calendar availability
- Insurance configuration
- Service areas
- Policies
- FAQs
- Uploaded approved documents

The AI may make wording natural.

It must not invent business facts.

---

39. Critical Anti-Hallucination Rule

If business data is:

- Missing
- Unavailable
- Conflicting
- Outdated
- Uncertain

the AI must NOT guess.

It should say something similar to:

“I don’t have confirmed information for that right now. I can connect you with the team or take a brief message for follow-up.”

The AI must never invent:

- Appointment availability
- Staff availability
- Prices
- Insurance acceptance
- Network status
- Order status
- Repair status
- Service status
- Promotions
- Business hours
- Service area
- Business policies
- Any other business-specific information

---

40. Insurance Rule

For Dentist, Medical Clinic, and Chiropractor templates:

Insurance recognition and insurance authority must remain separate.

Recognition dictionary:

Helps the AI understand insurer names.

Authority:

The actual business insurance configuration.

Example:

```
payer = Aetna

accepted = true

network_status = PLAN_DEPENDENT

verification_required = true
```

Possible status:

`IN_NETWORK`

`OUT_OF_NETWORK`

`PLAN_DEPENDENT`

`UNKNOWN`

Never answer based only on the recognition dictionary.

---

41. Safety / Emergency Handling

Support:

`NORMAL`

`URGENT`

`EMERGENCY`

Examples:

Medical / Dental / Chiropractor

- Trouble breathing
- Severe bleeding
- Serious swelling
- Serious trauma
- Other business-configured emergency indicators

A chiropractic clinic should not treat potentially serious symptoms as an ordinary adjustment appointment when escalation is appropriate.

Home Services

- Fire
- Smoke
- Gas smell
- Carbon monoxide concern
- Serious electrical hazard
- Major active flooding

Veterinary

- Trouble breathing
- Severe bleeding
- Seizure
- Serious trauma
- Suspected poisoning

Do not allow AI to diagnose or provide unsafe troubleshooting.

---

42. Industry Restrictions

Medical / Dental / Chiropractor

AI must not:

- Diagnose
- Prescribe
- Change medication
- Guarantee insurance coverage
- Interpret clinical results independently
- Promise treatment outcomes
- Tell a caller chiropractic care will cure a medical condition

Law Firm

AI must not:

- Give legal advice
- Predict outcomes
- Claim attorney-client relationship exists

Insurance

AI must not:

- Claim licensed-agent status unless properly configured
- Guarantee coverage
- Make unauthorized policy determinations

Accounting

AI must not provide unsupported tax or legal conclusions.

Veterinary

AI must not diagnose or prescribe.

Home Services

AI should not provide dangerous electrical, gas, fire, or hazardous repair instructions.

---

43. Business Permissions

Business owner should control whether AI can:

- Answer calls
- Make outbound calls
- Schedule
- Reschedule
- Cancel
- Take messages
- Create callbacks
- Transfer calls
- Send SMS
- Send email
- Create CRM contacts
- Create leads
- Create tasks
- Create service tickets
- Provide approved pricing
- Provide quotes
- Access account information
- Trigger workflows

Each:

`DISABLED`

`AI_ALLOWED`

`HUMAN_APPROVAL_REQUIRED`

---

44. Follow-Up SMS

Allow automatic SMS after successful:

- New appointment
- Reschedule
- Cancellation
- Reservation
- Service visit
- Consultation
- Chiropractic appointment
- Callback request
- Estimate request
- Order-ready event
- Vehicle-ready event

SMS should only send after underlying backend success.

---

45. CRM Call Summary

After every completed call, create a SHORT summary.

Example:

Caller: John Smith
Phone: 555-123-4567
Reason: Tooth pain
Result: Message sent to front desk
Callback: Requested

Chiropractor example:

Caller: Maria Lopez
Phone: 555-222-3344
Reason: New patient with lower-back pain
Result: New-patient consultation scheduled
SMS: Sent

Home-service example:

Caller: Sarah Jones
Reason: AC not cooling
Result: Service scheduled Tuesday 2–4 PM
SMS: Sent

Do not generate unnecessarily long summaries.

Final Requirement

The AI receptionist should feel like a capable human receptionist without pretending to be human.

It should:

1. Listen first.
2. Understand the caller's request.
3. Ask only necessary questions.
4. Use authoritative business data.
5. Complete only permitted actions.
6. Respect appointment duration and staff availability.
7. Transfer when appropriate.
8. Take a short message when necessary.
9. Automatically summarize long messages.
10. Create callbacks when requested.
11. Fail safely if integrations or business information are unavailable.
12. Never claim an action succeeded before backend confirmation.
13. Never invent business information.
14. Never perform an action the business owner has not authorized.
15. Use one shared message-taking engine and one shared AI receptionist engine across all industries.
16. Treat Chiropractor as its own industry template, with scheduling, insurance, patient-message, safety, and routing behavior appropriate to chiropractic clinics.
